

Manufacturing Engineer – (Job Ref: 23/MMED)

Location: Ireland, Dungloe. **Shift Pattern:** Monday-Friday, 8:40am-5:20pm.

Randox Laboratories is a global diagnostics company headquartered in Northern Ireland. We employ more than 2500 staff globally and have a presence in over 145 countries. Recently we have processed over 20 million COVID 19 tests for the British Government as part of the National COVID Testing Programme. We are looking for a Manufacturing Engineer to assist with the design, development, application, and maintenance of manufacturing procedures and processes for engineering products and projects.

The role:

- Design, development, and maintenance of manufacturing procedures and processes.
- Design of manufacturing systems and facilities.
- Providing feedback to the Engineering Department on design issues relating to the manufacturability of engineering products.
- Monitoring and ensuring adherence to manufacturing procedures.
- Training of manufacturing staff
- Assisting in setting up and coordination of effective manufacturing teams.
- Assisting in the coordination and development of supply chains.
- Trouble shooting technical problems that arise in the manufacturing process.
- Maintaining awareness of new systems and technologies that could be beneficial in manufacturing.

The Candidate:

Essential:

- Degree / HND in Mechanical or Manufacturing Engineering, or relevant engineering discipline.
- Minimum of 2 years' experience in a manufacturing environment.
- Possess a hands-on approach and practical engineering skills.

Desirable:

- Have experience with CAD Systems / 3D solid modelling.
- Experience of manufacturing electromechanical assemblies.
- Experience of Six Sigma, the 5 S's approach to manufacturing, General "Good Manufacturing Practice" protocols and T.P.M.

As a Gaeltacht employer Randox encourages applications from Irish speakers.

Randox Laboratories is passionate about improving global health and saving lives through the development of innovative and pioneering products. Through our commitment and the skill of our people we have grown to be a world leader in diagnostics for clinical healthcare, toxicology, food security and providing quality solutions to over 145 countries. In order to serve our growing international markets we require high calibre applicants with scientific, engineering, software and broader business skills – including sales, marketing, logistics, finance and many more.

Central to the Randox ethos is our drive to improve healthcare worldwide and every one of our staff plays a vital role in this aim.

Randox is an equal opportunities employer.
